### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. M. Gencarella, esq., on 01/18/2007.

The application has been amended as follows:

In claim 15 after the words "consisting essentially of silicon" insert ---, nitrogen---

In the abstract delete the word "also" after the words "a silicon containing pre-coat is"

In the abstract delete the last sentence, reciting: "The silicon containing coating is configured to seal particles between the inner surface and the silicon containing coating."

### ***Response to amendment***

2. All previous rejections and objections have been overcome by the amendment, filed 10/24/2006 in combination with the Examiner's amendment and the objections and rejections are withdrawn.

### ***Allowable Claims***

3. Claims 15, 17, 19-22 are allowable over the prior art of record.

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance: The closest prior art of record are Koemtzipoulos et al (U.S. 6,071,573) and Urabe (U.S. 6,383,302).

Koemtzipoulos teaches a semiconductor processing apparatus wherein the inside surfaces are covered with silicon containing coating composed of silicon, oxygen and fluorine. Since the coating is considered as the integral part of the apparatus, the teaching of Koemtzipoulos fails to anticipating or suggesting fairly the apparatus wherein the inside surfaces are covered with coating consisting essentially of silicon, nitrogen and one of bromine or chlorine.

Urabe teaches a semiconductor device manufacturing apparatus, wherein the substrate holder is covered with silicon nitride film. Urabe fails to anticipate or suggest fairly the apparatus having a top electrode positioned as instantly claimed and having inside surfaces covered with the coating film consisting essentially of silicon, nitrogen and one of bromine or chlorine.

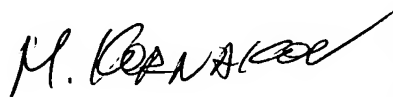

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
